SUBJECT: STUDY IN INDIA EDUCATION FAIR & NETWORKING SEMINAR BETWEEN INDIAN & CAMBODIAN UNIVERSITIES ON 1<sup>st</sup> APRIL 2024 AT SOFTEL PHNOM PENH PHOKEETHRA

Dear Esteemed Educators,

Greetings of the day

India-Cambodia relations go back to the 1st century AD when Hindu and Buddhist religious and cultural influences emanated out of India to various parts of South-East Asia and the contemporary times have also witnessed the expansion of cooperation between India & Cambodia which has been sustained by regular exchange of bilateral visits, cultural exchanges and cooperation in diverse fields including the field of education.

We would like to take this opportunity to strengthen the academic cooperation in areas of mutual interest between Indian Institutions and Cambodian Institutions and we are pleased to introduce SAPE as an international education solution providing organization, conducts education expositions & Conclave across the globe and provides a platform for Institutions to recruit foreign students and to collaborate with the foreign institutions.

About Indian Education

World recognized degree

According to the World Bank, India has the third largest higher education system in the world, next only to China and the United States. India has one of the most advanced infrastructure for higher education. Indian degrees are treated with respect all over the world and professionals who have undertaken higher studies in India have made significant contributions to advanced and applied research in different disciplines all over the world. A number of Indian Institutes for higher studies have come to symbolize academic excellence over these years.

Highly Ranked

Every year, India's vast higher education system attracts large numbers of enthusiastic knowledge seekers from various parts of the world, particularly from fellow developing countries. The Indian education system has established a strong

position internationally, both in terms of range and quality, and currently ranks amongst the top two in the world in terms of number of educational institutions.

### Information Technology

India is the largest destination for information technology in the world and the IT industry is one of the fastest growing industries in the country. India leads the world in the production of world-class Information Technology (IT) and management professionals and has the world's second largest education network. Indians have played a key role in the success of technology powerhouses globally. From Google to Microsoft, Cognizant to NetApp -- Indians run some of the world's biggest and best companies.

We are extremely delighted to extend our warm invitation to the Cambodian Institutions and Universities to participate in the upcoming STUDY IN INDIA EDUCATION FAIR & NETWORKING SEMINAR Supported by Embassy of India, Cambodia & Indian Business Chamber in Cambodia on 1<sup>st</sup> April 2024 at SOFITEL PHNOM PENH PHOKEETHRA.

The networking seminar will aim the following missions:

The STUDY IN INDIA EDUCATION FAIR will provide a platform for Cambodian Institutions/Universities to explore potential partnerships with Indian Institutions through –

*\*Twinning Program* – Twinning programs are based on credit transfer agreements between collaborating institutions. These are typically 2+2 or 3+1 types of arrangement where courses taken at an Indian institution are recognized and easily transferred to collaborating foreign Institutions.

*\*Dual Degree Programs* – Involves the curriculum cooperation of two or more higher education institutions. Students who study at two higher education institutions receive upon the completion of the study program a separate degree certificate from each of the participating institutes.

*\*Research Collaborations* – Research Collaborations often evolve from existing faculty relations.

*\*Joint Degree Programs* – are arrangements where students study at two higher education institutions and receive upon the completion of the study program a single degree certificate issued and signed by all the participating institutions jointly. It's most common in the Business & Management field.

The rationale behind networking events is not only to bring together key stakeholders including policy makers, educationists and industry at both countries for deliberations and knowledge sharing but also to create an ecosystem for developing strategic partnerships in the Education sector between India and Cambodia.

We believe that through collaborative efforts, we can create impactful opportunities for students & faculty members during the program.

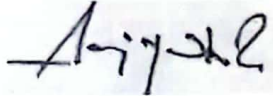

We look forward to welcoming you to this esteemed gathering and fostering meaningful partnerships that will benefit our academic communities and the students of Cambodia.

We look forward to receiving your active participation.

To confirm your attendance and for any further inquiries and assistance regarding your presence in the event, please feel free to contact
